lauv

Bandit Aiklavyaveer

Level:

+ used man ssh command and read that ssh usernagia@bask-p port and then entering

password when prompted allows to login

Level 0-1

1+ read s,c6, ct, fle, du, find command descriptions

+ used isto see all les and cat to see content in eadme fle

Level 1-2:

+ learnt that for filenames beginning with 2, we can give the whole dectary_/-fle to make it

Work ike normal or alee it thinks that the -is apart of same command

Level 2-3:

1+ filename contained spaces, so entered the name within single quotes

Level 3-4:

+ letosee contents, cinta inhere directory

+ used ig-a to see even hidden files, als didnot show hidden files

1+ found hidden fle, used cat to display contents

+ used file_J* command to check all fle types

+ allfles ware of type data except one which was of type ASCII txt that contained the password,

Level 5-6:

+ used find. type size 2033c to find alls inside the current directory that are of type fle and match a size of 1032 bytes (e-bytes)

Level 67:

+ used find / type f-user bandit? -group bandit6 size 33c where the / in find / directs itto search from the root or search the entire astern

Level 7-8:

+ learnt about the grep, sor, unig strings, base64, tr, tar, gig, blp2, sad and also awk commands

+ grep uses regex to filter for matching patterns from # file
+ used grep millionth datatxt to match the viord millionth and print the line itis contained in

+ ie this case) can also add | awk {print $2) to take the output from grep command as input into awk and print the 2nd column in the ine containing millionth, ig only print the password

2 2uk/millionth {print $2} datatbe also works

+ used sort data. | ypiq-cto sort and remove duplicates, then find the number of

occurrences of each (naw unique) line

+ orcanuse sort dataxt | upig- that only shows the unique ines

+ using sort first is necessary because ypiq.only compares adjacent ines for uniqueness

Level 9-10:

+ used stings data.pt to extract all human readable strings then combined | grep

for those containing

tofiter
